NOTE	Ripple & noise are measure     Tolerance : includes set up     The power supply is consided EMC directives. For guidant.	<ol> <li>All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25<sup>°</sup>C of ambient temperature.</li> <li>Ripple &amp; noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf &amp; 47uf parallel capacitor.</li> <li>Tolerance: includes set up tolerance, line regulation and load regulation.</li> <li>The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies."
