

Specifications interMARINE 500VA

Isolating Marine transformer

interMARINE transformers are especially designed for shipbuilding and marine industry applications. They are also suitable for other industry applications where the conditions are more stringent, and the transformer is required better corrosion and vibration resistance.

interMARINE transformers can be ordered fully customized by your requirements.

Intertrafo Oy manufactures all wound components in accordance with the IEC-standards. Other standards on customers request.

<i>Primary</i>	max 690Vac
<i>Secondary</i>	max 690Vac
<i>Rating</i>	500 VA
<i>Frequency</i>	47 - 63Hz
<i>Protection degree</i>	IP00
<i>Thermal Class</i>	B (130°C)
<i>Ambient temperature</i>	45°C
<i>Terminals</i>	Terminal block, 4mm ² -16 mm ²
<i>Dimensions, weight</i>	120 x 124 x 122 mm, 6,6 kg
<i>Standards</i>	EN61558 - 2 - 4
